PROJECTS

Magnetic — AI Workspace & Desktop Code Editor (Team Product, Contributor) — One AI workspace to code, generate images and create video, where an agent plans, builds with tests in view, and waits for review before anything ships. Monorepo with a desktop editor and agent harness, a multi-provider AI gateway and a credits dashboard; installers for macOS, Windows and Linux. Next.js, TypeScript, Electron. Live | GitHub

AIDE — AI Customer Support Agent SaaS (Ongoing) — Platform where businesses build support agents that answer from their own FAQs and documents with cited replies, run allowlisted HTTP actions behind confirmation gates, hand off to humans, and report sentiment and topic analytics. Ships as a one-line embeddable widget, live on the Brandly site. Next.js, TypeScript, Node.js, LLM APIs. Live

Brandly — AI Brand–Influencer Collaboration Platform (Final Year Project, Lead Developer) — Two-sided SaaS marketplace in a Next.js 15 + Express 5 monorepo with Prisma on Neon Postgres. Built an explainable AI engine that ranks influencers on niche, budget and audience, Stripe Connect escrow released per approved deliverable, and real-time chat over Socket.IO, secured with JWT rotation, Google OAuth and role-based access. Live | GitHub

Developer Portfolio — Next.js Monorepo — Turborepo monorepo with shared content, UI, database and mail packages, a custom Three.js WebGL portrait shader, NextAuth, and an interactive in-browser shell whose hire flow saves to Neon Postgres and emails via SMTP. Live | GitHub

PChat — Real-Time Chat Application — Real-time messaging with expiring rooms, invite links, LAN room discovery, file sharing, admin controls, and group and direct chats. React 19, Firebase Authentication, Realtime Database, Tailwind CSS. Live | GitHub
